

Wildlife Wonders

June 2021

Upper Schuylkill Valley Park

During the month of June, we welcome visitors to take a second look at how the animals at the park behave and why!

Through videos on our website, visitors will see and experience some of the unique behavior of our animals. Visitors will learn how to study animals and gain insight into how animals think by how they act. You'll be able to download a journal sheet to record your animal observations while watching the videos. Kids can also bring their journal with them the next time they visit the park to continue to use their observation skills in person.

This program is for children ages 6-9, however the whole family may find themselves joining in to observe the animal's behaviors.

View our fun filled program about animal behavior on the park's website at
